PROFILE

B.Tech (AI/ML) 2nd Year student building end-to-end web and AI-powered applications. Skilled in JavaScript, TypeScript, and Python, with hands-on experience in HTML, CSS, React.js and Tailwind CSS. Experienced in backend development using Node.js, Express.js along with API development and n8n workflow automation. Proficient in MySQL and PostgreSQL for data analytics and visualization. Passionate about building scalable, production-ready products and integrating AI and automation into real-world applications.

PROJECTS

FilmFinder - A Movie Watchlist App

JavaScript (ES6+) · CSS3 · REST API · Responsive Design · API Integration

2026

- Developed a movie discovery platform enabling users to search and explore a database of 10,000+ movie titles through real-time API integration.
- Implemented advanced filtering and sorting functionality, allowing users to efficiently discover movies based on multiple criteria.
- Designed and developed a personalized watchlist feature, enabling users to save, organize, and manage 100+ movies with custom categorization.

Twixter - Clone Of Twitter

React.js · JavaScript (ES6+) · CSS3 · REST API · Responsive Design · API Integration

2026

- Developed a dynamic social media platform that enables users to create posts, interact with content, and engage with other users in real time.
- Collaborated within a team to design and implement key features such as user authentication, post creation, likes, and interactive UI components.
